"[O]ur body, including our emotions, plays a crucial role in being able to make sense of things, so as to see what is relevant, our ability to let things matter to us and so to acquire skills, our sense of the reality of things, our trust in other people, and finally, our capacity for making unconditional commitments that give meaning to our lives. It would be a serious mistake to think we could do without these embodied capacities - to rejoice that the World Wide Web offers us the chance to become more and more disembodied, detached ubiquitous minds leaving our situated bodies behind."

Hubert L Dreyfus, *On the Internet*, London, Routledge, 2001, p. 90.
